AF 3700

PATENT APPLICATION

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE BEFORE THE BOARD OF PATENT APPEALS AND INTERFERENCES

In re application of

Docket No: Q45980

Hisashi YAMAGISHI, et al.

Appln. No.: 08/898,853

Group Art Unit: 3711

Confirmation No.: 6473

Examiner: Raeann Gorden

Filed: July 25, 1997

For: MULTI-PIECE SOLID GOLF BALL

RECEIVED

NOV 1 4 2002

SUBMISSION OF APPELLANT'S BRIEF ON APPEAL

Commissioner for Patents Washington, D.C. 20231

TECHNOLOGY CENTER R3700

Sir:

Submitted herewith please find an original and two copies of Appellant's Brief on Appeal. A check for the statutory fee of \$320.00 is attached. The USPTO is directed and authorized to charge all required fees, except for the Issue Fee and the Publication Fee, to Deposit Account No. 19-4880. Please also credit any overpayments to said Deposit Account. A duplicate copy of this paper is attached.

Respectfully submitted,

SUGHRUE MION, PLLC 2100 Pennsylvania Avenue, N.W. Washington, D.C. 20037-3213 Telephone: (202) 293-7060

Facsimile: (202) 293-7860

Date: November 8, 2002

Registration No. 35,603

<u>APPENDIX</u>

CLAIMS 13-19 ON APPEAL:

13. A solid golf ball comprising a solid core having a three-layered structure composed of an inner layer, an intermediate layer formed outside said inner layer, and an outer layer formed outside said intermediate layer, and a cover for coating said solid core, wherein:

said inner layer is designed to have a Shore D hardness which is lower than that of said intermediate layer;.

said intermediate layer is designed to have a Shore D hardness of 45 to 65; and said outer layer is designed to have a Shore D hardness which is lower than that of said intermediate layer.

- 14. The solid golf ball according to claim 13, wherein said inner layer has a Shore D hardness of 20 to 40.
- 15. The solid golf ball according to claim 13, wherein said inner layer has a diameter of 20.0 to 29.0 mm, said intermediate layer and said inner layer have a combined diameter of 35.0 to 39.5 mm, and said outer layer, said inner layer, and said intermediate layer have a combined diameter of 37.5 to 41.0 mm.

- 16. The solid golf ball according to claim 13, wherein a weight distribution in said solid core is designed so that said inner layer has a large specific gravity, and said intermediate layer and said outer layer have specific gravities which are smaller than said specific gravity of said inner layer.
- 17. The solid golf ball according to claim 13, wherein said solid core is formed by using a rubber composition comprising a base material composed of natural and/or synthetic rubber.
- 18. The solid golf ball according to claim 13, wherein at least one layer of said solid core is formed by using a material comprising one selected from ionomer resins and thermoplastic resins.
- 19. The solid golf ball according to claim 13, wherein said cover is formed by using an ionomer resin or a material containing it.
